

## TANISHQ PAL

Aspiring Software Developer passionate about turning innovative ideas into impactful solutions. With a solid foundation in programming languages like Java, along with web technologies such as HTML, CSS, JavaScript, and React I have developed and contributed to various projects that showcase my problem-solving skills and technical expertise.

Currently seeking an internship or entry-level position where I can apply my skills, learn from industry professionals, and grow within a dynamic team. My experience with full-stack development, along with my ability to quickly adapt to new technologies, makes me a versatile and valuable addition to any project.

Let's connect and explore how I can contribute to your team's success!

## Projects

### CodePen - Using React (JS lib)

This project is a feature-rich, user-friendly code editor designed to streamline the coding process for web developers. The editor supports HTML, CSS and JS languages, provides intelligent code suggestions, and options to enhance productivity.

### Inventory Management System • -(Using HTML, CSS, JS and MySQL DB)

This system streamlines inventory tracking, order management, and supply chain operations, ensuring that retailers can manage their stock efficiently and meet customer demands without delays.
